GEM

Why Premier is Better

1. First to ripen.
2. Remarkably frost resistant.
3. Long fruiting season.
4. Unusually large crops.
5. Size above average.
6. Bright, glossy, solid color.
7. Uniform, attractive shape.
8. Firm berry, excellent shipper.
9. Buyers pay a big premium for Premier.

PREMIER

GEM *Everbearing*

Make Money This Fall With Gem

Gem is the everbearer fruit growers have been looking for because unlike all other everbearers, it is an excellent plant maker on good or poor soils and in wet or dry seasons. This fact means that it can be depended on for good crops every year. Here we have a really fine fall berry of good size, fine flavor and unusual firmness.

Productiveness—Flavor—Firmness

1. **Productiveness.** GEM makes so many more plants than other everbearers that it produces many more berries.
2. **Flavor.** A true strawberry flavor—something most everbearers don't have.
3. **Firmness.** Remarkably firm—only everbearer that reaches market in really first class shape.
4. **Profits.** Because of size, firmness and sure crops—good profits are certain.

MICHIGAN EXP. STATION SAYS: "Gem is certainly a wonder as far as plant making is concerned and it certainly bears well."

You can plant Gem with full confidence of a full fall crop and good profits. (Prices, page 9.)

PREMIER

The Great Commercial Berry

When all is considered PREMIER is the most profitable strawberry variety grown today. It puts a big crop of fine appearing berries on the market first every time and does it in spite of frosts that often kill other varieties. These two facts are PREMIER'S greatest points of superiority as a dependable money-maker. PREMIER eliminates crop failures, and by ripening five days to a week earlier than any other kind, it never fails to command high prices. Always produces its good crops on a wide range of soils and climates throughout the country.

Actually millions more Premier plants have been sold the past few years than any other kind. Premier continues to be widely planted in larger quantities than any other early berry. Growers know that PREMIER is an unfailing money-maker every year. Consumers demand it. You will need to grow PREMIER—and plenty of them—to be in the berry business profitably.

Order at once so we can reserve yours. Our plants are guaranteed true-to-name, healthy and vigorous. You can depend on them to make money. (Prices, page 9.)

Earliest of All—

Frost Proof

If you want to make more money, plant Premier this spring!

Here Is Your *FREE* Gift for 1941!!

With Orders of \$3.50 or More

The Handiest Household and Garden Glove Ever Made For Men or Women!

Baldwin's 1941 FREE GIFT OFFER to you is an offer you cannot afford to miss. Every one of our customers ordering from this new catalog is entitled to receive a pair of these handy, all-purpose Gloves if order totals \$3.50 to \$6.00. Orders totaling \$6.00 or more entitle you to two pairs. You can have your choice of men's or women's styles—"Swaggerettes" for women, the "Handy Man" for men. Be sure to ask for these latex coated fabric gloves on your order. Why not make up your order today?

Swaggerettes
SNAG-PROOF
WATER-PROOF
AND DIRT-PROOF
EASY TO SLIP
ON AND OFF

Women everywhere say they wouldn't be without Swaggerettes. They are the most practical home and garden gloves for comfort, durability, usefulness and economy. Made of latex coated fabric. These new, smart, colorful gloves are protecting thousands of women's hands in dozens of everyday tasks.

Snag Proof — Water Proof — Dust Proof

These gloves are distinctly different — more useful — more comfortable—more durable. Made of colorful rubber outside—soft fabric inside. They're easy to put on and take off. Smart looking, too! They give you all the advantages of rubber plus the added strength and comfort of soft fabric lining.

Here's How You Get These Gloves Absolutely Free!

Make up your order from any stock in this catalog amounting to \$3.50 to \$6.00 and we will send you one pair FREE; if your order amounts to over \$6.00 you are entitled to two pairs FREE (NOTE— specially priced offers or bargains cannot be included to make these totals.) Remember, if you order early you can get the Special Cash Discounts given below, as well as the Free Gloves.

Ladies gloves are available in green, in medium or large size. Men's gloves are black, standard size. State size and style.

Additional Pairs For Men or Women—49c Per Pair

A Better Glove For All Household and Garden Chores

A MILLION PEOPLE ARE USING THEM—SAY "THEY'RE BEST YET"

BALDWIN'S GUARANTEE

For 52 years the Baldwins have backed up this guarantee to the entire satisfaction of their thousands customers everywhere. We guarantee every plant, tree, shrub or bulb by us to be first class, free from injurious disease or insects, and true-to-name. We further guarantee our stock to reach you in good growing condition and will replace free of charge any that does not, when we are notified within 5 days of receipt of stock. Also we will, on proper proof replace or refund the purchase price of any stock that proves untrue to name. We are, of course, not liable for more than the purchase price of stock ordered.

All contracts and agreements are made subject to flood, drought, fire, frost, crop failure or other causes beyond our control.

CASH DISCOUNTS FOR EARLY ORDERS

10% on orders sent by February 15
5% on orders sent by March 15

These discounts apply to all prices in the catalog except special collections and where otherwise noted, or special prices quoted by letter. Cash in full must be sent with order.

Add Extra Stock for the Amount of Discount if You Prefer.

THANK YOU

We will appreciate your handing your Catalog to a neighbor or friend interested in nursery stock, when you are through with it.

More Money From Better Fruit

proving business in every line in cities and towns in every state. This means higher prices to the fruit grower and bigger profits to the man, who is on his toes and ready with a good crop.

One more thing is that right in this catalog you can find everything you need to help you make greater profits from your fruit farm, or for making your fruit and flower garden more complete. We have selected only those varieties, both old and new, that have proven of outstanding value and generally satisfactory in all fruit sections, and are giving you the important facts about each variety. Many new and better kinds are gradually replacing the old. Our soil and climate here in the heart of the Michigan Fruit Belt produces the finest of all kinds of nursery stock and the many customers who get their plants and trees from us year after year, prove that you, too, can depend on this better stock and our way of growing, grading and packing it to make you money.

In nursery stock, more than in most things, good quality cannot be seen and confidence is the guide to where your order is placed. The fact that this is our 52nd successful year in the nursery business reminds us forcibly of the splendid confidence our many customers have in us and makes us feel more strongly each year our obligation to give the finest quality at a reasonable price.

Please feel free to write us at any time. Our years of experience are yours to call on not only before but also after you have received your shipment. Again we ask for your order and know you will be fully satisfied in every way with our nursery stock and the service we give you.

To Our Friends and Customers:

In this brief message to you there are just two or three things we want to say. One is that in these times it seems that the most sensible and most helpful thing for all of us to do is do "business as usual." In that way we can move along successfully and profitably for all.

Another is that there is certain to be a big increase in the use of delicious, healthful fruit both fresh and canned, due to rapidly im-

O. A. D. Baldwin

G. W. R. Baldwin

FAIRFAX

FAIRFAX—Early

Leads All In Firmness and Quality

Like Dorsett, Fairfax is a superior berry, particularly in firmness and flavor. Originated by U. S. D. A. in 1925. Big profits to growers and rapidly increasing plant sales show that Fairfax is making good as one of the leading varieties.

How Fairfax Differs From Dorsett

1. Called the most deliciously flavored of all. 2. Even firmer berries. 3. Berries are larger. 4. Color dark red, turning darker after picking. 5. Does not make quite so many plants. 6. Not quite so productive as Dorsett but will average as good as Premier.

WHICH TO PLANT? Both are wonderfully fine berries. Both are of superior size and flavor, making either desirable for home gardens. The lighter, more attractive color of Dorsett may make it more profitable for the general market. But the somewhat larger size and exceptional quality of Fairfax are to be considered. **BE SURE TO PLANT SOME FAIRFAX THIS SPRING.**

STRAWBERRIES

OUR SPECIALTY FOR OVER 50 YEARS

These Varieties Pay For Garden or Market

You can make money every year with strawberries. They show a record of good profits through "good" and "bad" years. Strawberries are easy to grow, produce a big crop in small space, and remember, they are the only fruit that will bring you a full crop in one year from planting.

Start with good plants. Fifty years' experience are behind Baldwin's plants—guaranteed true-to-name and in healthy planting condition when you get them. You cannot get better anywhere at any price. Be certain of good growth and good crops. We offer only those varieties—both old and new—that we know are dependable and profitable. Many kinds, particularly the newer ones, sell early so we urge you not to delay your order.

CATSKILL—(See Illustration on Front Cover)

BEST AND MOST PROFITABLE MIDSEASON BERRY

It is only once in a while that a new variety proves so satisfactory in every way and so profitable as Catskill has done. Its biggest feature is its enormous crops of big, fine, bright scarlet, green-capped berries. Picking begins just after the early kinds and Catskill berries are of great size and firmness to the last. Plants are unusually strong, hardy, healthy, little affected by diseases and will produce their great yields in all soils and seasons. With Premier for early and Catskill for midseason to late you have a combination for top prices over the best of the strawberry season.

ENORMOUS CROPS OF FINE, BIG BERRIES

Such a splendid midseason berry is needed to follow the fine very early varieties Premier, Dorsett and Fairfax. CATSKILL does it successfully, and is making money for everyone who grows it. It will pay you and we recommend it fully. For home garden, Catskill is ideal because its fine flavor, rich color and large size are just right for canning and preserving or fresh for table use.

New York Experiment Station, the originator, says:—"Catskill is notable for being very large and very productive. Plants are vigorous and free from leaf-spot. Ripens later than Premier and is of better quality as well as being larger. Much more productive than Dorsett and Fairfax."

BE SURE TO PLANT CATSKILL THIS SPRING. (Prices Page 9)

DORSETT

For Big Early Crops

One of the best of all varieties for big regular crops. You can depend on it for good profits every year. Dorsett has been widely planted in all fruit sections and has come through with paying crops every time. We advise you to plant it. You need Dorsett to get the most out of your berries.

Every Desirable Strawberry Feature

Experiment Stations in Michigan, Illinois, New York, and Washington, D. C., do not hesitate to say that it is superior to Premier in size and quality. Commercial growers like Dorsett because it makes more profit. It does so because its firmness, big size, fine flavor and wonderfully bright color are just what both wholesale buyers and the housewife want. Originated by the U. S. Dept. of Agriculture at Washington, 1923, it has proven superior in these points:

1. Ripens almost as early as Premier.
2. Size and yield above average.
3. Very vigorous grower, making almost as many plants as Blakemore—assuring good crops even in poor seasons.
4. Firmer berries—fine shipper.
5. Light red, glossy berries that buyers pay more for.
6. Flavor superior to any other unless it is Fairfax.

With these features combined in one berry, you have the ideal berry for home or commercial use. You will make no mistake in a good planting this spring. We have a stock of fine, genuine Dorsett. Don't wait—there is a big demand.

AROMA—Late

Most Profitable Late Berry

Look over any government report of strawberry production and you will see that growers in those sections where Aroma is widely grown, ship a full crop every season and regularly receive top prices for their Aroma. In spite of any newer late varieties it is still the best and most satisfactory late berry for general commercial planting in all fruit sections. It is a fancy market berry.

A steady producer of big round, deep red glossy berries of excellent eating quality. Tough skin and firm flesh make a splendid shipper. Produces its big crop on any good soil.

AROMA is unusually mild and sweet. A fancy berry in the truest sense of the word, which greatly adds to its marketability at top prices. Steadily growing in favor for the last 15 years; has proven its worth under all conditions. Our guarantee is behind this variety in every respect.

AROMA

New GRAND CHAMPION

Remarkably Long Fruiting—40 Days

Tall vigorous plants protect early blossoms from frost and also keep the last berries fresh and bright. More fruit growers are planting it every year. Make your planting this spring.

BIG CROPS GOOD QUALITY GREAT SIZE

GRAND CHAMPION is a money-maker. Unusually frost resistant; ripens over an unbelievably long season beginning a few days after Premier—Sometimes lasts 40 days. Growers make big profits with Grand Champion because of its big crops, good quality, great size and good shipping qualities that put it on the market for top prices. We recommend it for your planting.

Ours are genuine GRAND CHAMPION. Plant this spring.

GRAND CHAMPION

BEAVER—Early

For Poor Soils and Cold Winters

PRODUCTIVE HARDY BERRY. A newer variety recently originated in Wisconsin and has proven a satisfactory producer in all northern fruit sections. A cross between Premier and Dr. Burrill. Beaver berries have the bright attractive appearance and uniform shape of Premier, but like Dr. Burrill it is a much better plant maker on any good land and is especially recommended for poorer soils. For this reason, Beaver is more certain than Premier to bring regular good crops.

BEAVER

SENATOR DUNLAP

Old Reliable Money-Maker

Senator Dunlap (or Dr. Burrill) is probably better known throughout the country than any other strawberry. It has the reputation of producing full crops in a wider range of soil and climate than any other variety. No wonder growers in nearly every state in the Union order more of this old reliable berry every year. Today Senator Dunlap is one of the three or four strawberries that buyers know and ask for throughout the country.

Certain Crops Everywhere

Uniform berries of dark red color. Splendid shipper and ready seller because of its attractive appearance.

Many canning factories want nothing but Senator Dunlap and contract for thousands of cases yearly. They know it always holds its shape and rich color long after canning—and that the flavor lasts. Last year we sold out of Dunlap early and the demand is equally heavy this year. We have a good supply but urge you to order yours early. Order yours at once and we will reserve them. Ripens Mid-Early.

BLAKEMORE—Very Early

Exceptionally Productive—An Ideal Shipper

An early berry of outstanding commercial value. One of the firmest berries we know of and its glossy, bright red color does not fade or turn dark when picked. These two facts and its very early season make it a most profitable variety for either local or distant markets.

FIRM BRIGHT BERRIES—REAL STRAWBERRY FLAVOR

Unusually good plant maker—much better than Premier in this respect. Berries resemble Premier but are lighter red, as large and have more of a "strawberry" flavor and therefore better for canning and preserving. Fruit stems are upright, making easy picking. Plants are vigorous, healthy growers. One of the most valuable varieties originated by U. S. Department of Agriculture.

Particularly desirable on locations where it is hard to get a good stand of Premier. Blakemore when kept to a narrow picking row will produce a money making crop of finest berries every time.

CLERMONT

A new Medium Early Variety. Outstanding for exceptionally heavy plant growth and big crops of large, smooth, fine colored berries. Side by side with Premier it has produced larger sized fruit and greater quantity at a picking. Introduced by N. Y. Experiment Station. Recommended for general northern planting—a hardy, vigorous grower, well worth a good trial. Clermont berries are unusually fine flavored.

BLAKEMORE

ABERDEEN—Midseason Money-Maker. One of the heaviest producers of fine large, light colored berries—the kind that always sell well. Does well on heavier soils. Try Aberdeen.

EVERBEARING STRAWBERRIES

WAYZATA

Finest Flavor of All

Government Experiment Stations say: "Wayzata is far superior to any other everbearer; large as Mastodon; bears heavier; most attractive appearance; best of all everbearers in quality and flavor."

Wayzata has proven every one of these statements in home gardens and commercial plantings all over the country. If you are not now growing it, you should do so because Wayzata is the best everbearer and finest flavored strawberry we have ever seen.

Flavor: Far superior to any other strawberry.

Size: 80% of berries as large as the largest Mastodon.

Acre Yield: 4-year average—200 24-pint cases and \$800; July to October.

Average Price: Per 24-pint case \$3.75 to \$5.00.

Of all strawberries, Wayzata is one that we would like every one of our customers to have in his garden because in all our experience we honestly have never tasted a strawberry that has such a wonderfully delicious flavor. Wayzata will give you a real treat. It does not make many plants but it surely does produce big berries because all its vitality goes into the fruit, making the berries very large, well formed and evenly colored. Each plant makes several fruit bearing crowns, each crown full of fruit stems so that the yield of one plant is many times the average. More plants can be set on small space and greater crops picked. Exceptionally strong growers on any good soil; with-

stand drought remarkably well. Red clear through—no green tips. Wayzata is hardy and frost resistant. **PLANT IN APRIL—BEGIN PICKING IN JULY—KEEP PICKING INTO OCTOBER.**

BIG YIELD—\$1,200 PER ACRE

For a grower who has fruited several acres for four years, the highest yearly return was \$1200 per acre from July to October, and the average was \$800. Many customers are making fine profits on local sales from a few hundred plants in a small garden. From these statements you can see that here is a really superior berry recommended by both Government Stations and commercial growers.

Plant at least 100 Wayzata for the pleasure of really delicious strawberries this summer and fall.

WAYZATA

Wayzata Clump Plants Produce More Fruit Quicker

These are big, 2-year old Wayzata mother plants that have grown a number of new crowns and new roots, several times as large as a one-year runner plant. Planted this spring each crown will make many fruit stems and the whole plant should produce a great quantity of berries this summer and fall. Plant in good rich soil; supply plenty of water. (Acid Sodas Humus, about one pound per plant, is a help on poor or dry soils.) Keep buds picked off to about June 15th; berries will ripen in early July.

You cannot beat GEM for dependable commercial crops. Makes lots of plants to produce quantities of firm berries that ship in fine shape. (Full description on inside of front cover).

GEM
Dependable Fall Crops

Everbearing Mastodon

Most Widely Planted Everbearer

Everyone wants and needs a good everbearer that can be depended on to produce plenty of good fruit regularly in the late summer and fall. Mastodon has shown year after year that it will do this in all sections and under most any soil and weather conditions. It is entirely satisfactory for the home garden or commercial patch. Baldwin's Mastodon Plants are guaranteed true-to-name and will do these things for you. Through years of proper selection and propagation they are superior in vitality and productiveness. The berries are "Mastodons" in size.

Plant plenty Mastodon and have good fruit to sell at top prices this summer and fall.

RASPBERRIES

Grow Black Raspberries For Regular Profit

Black Raspberries have regularly been bringing better than average returns every year. Fruit canneries always contract for a good part of the crop and this insures better prices all around. These are proven, profitable varieties. Michigan grown, double inspected raspberry plants are recognized throughout the country as the best. Our soil is especially adapted to produce sturdy, well rooted quick growing plants.

CUMBERLAND

Leading Commercial Variety

Low Prices
For Dependable
Certified Plants

Bears Heavily—Picks Easily—Always Makes Money

Clear money above all expense is what you want and you can depend on Baldwin's heavy producing vigorous plants for it. Cumberland is still the leading berry in the plantings of commercial fruit growers everywhere. Government Experiment Stations have found none that promise to be a better money-maker.

Plants vigorous and very productive; thrive everywhere. Berries large, firm, jet black with a delicious flavor. Wonderful long distance shippers—attractive appearance — always command good prices. Guaranteed to please you and make big money.

QUILLEN—Late

Here is a remarkable late variety about perfect in every way. Appears to be almost disease proof—producing good crops alongside other varieties being killed out. An unusually healthy grower, producing plenty of fruit canes and a big crop of very large berries. Berries larger than Cumberland, exceptionally large, of good shipping quality.

A heavy bearing, real late raspberry is needed to bring good crops at the end of the season when prices go up. Our increasing sale of Quillen plants shows that our customers have found that Quillen is the answer. We recommend it as the best late variety. Order now while we have them.

For Late Season Profits

NEW LOGAN—Early

Most Widely Planted Early Blackcap

This is the early variety growers have been looking for. It has all the good points other early berries have lacked. Its berries are good size, do not crumble (unusually firm), do not dry up, hold a glossy black color and have a deliciously sweet flavor. Logan is a fine home garden berry. Bears heavily, maturing most of its crop before Cumberland begins, and so gets the best of the early high prices. Many Michigan canning companies are contracting Logan because they like its rich flavor and uniform berries.

Ripens 6 to 9 Days Before Cumberland

Logan is recommended by Michigan and Ohio Experiment Stations. It has proven to be an entirely satisfactory commercial berry in the great fruit sections of these states. It is remarkably free from and resistant to disease; a strong grower, throwing out plenty of fruit canes.

We recommend Logan for its earliness, its excellent quality, its firmness and color for market. Plant Logan and you will be well repaid. Our price is low for this fine Early Raspberry.

SODUS

The New Early Purplecap Promises Great Profits

If you have not eaten purple raspberries both fresh and canned, you have a delightful experience coming for these berries have a color, aroma and flavor that call forth that "more" taste. They are something deliciously different.

This newcomer from the Expt. Station will be a money-maker because of its great size, attractive color, extra firmness and exceptionally heavy crops. Giant, bright purple berries, do not crumble, borne in great clusters on every branch. Flavor good—a blending of red and black raspberry.

SODUS is a rapid grower with great strong canes to carry its big load of fine fruit. So far it has shown almost complete freedom from mosaic; plant safely anywhere. Had no winter damage when others were frozen. Stands dry weather unusually well.

Sodus Has Size, Color and Quality

Sodus is the best of all purple sorts generally planted today; has proven both resistant to

drought and hardy in winter cold. A good sized, fine flavored purple raspberry with attractive appearance will make money. SODUS is such a berry and deserves extensive planting for commercial use. At home its tart flavor and great size are what everyone wants for canning and pies. Plant SODUS for a Really Good Purple Cap.

POTOMAC PURPLE — Great for Canning and Pies

The ideal home garden should have a wide variety of berries, and there is nothing more pleasing than this new purple raspberry introduced by the U. S. Department of Agriculture. While not as early and large as Sodus, its sweet, mild delicious flavor makes it an ideal home use berry.

Potomac is a very heavy bearer, ripens late, and bushes are hardy and remarkably free from all raspberry diseases. Progressive fruit growers are finding that purple berries bring above average prices because of their fine quality and striking appearance. Do not fail to order Potomac.

BRISTOL — The New Better Early Blackcap Unusually Hardy and Exceptionally Productive

Originated by the N. Y. Expt. Station where so many of our best varieties of all kinds of fruit have been produced, the Station says BRISTOL is probably the best of its new blackcaps for both market and home use.

The Station description states: "Berries are large to very large, firm, of excellent quality and mild, very good flavor. Plant characters are outstanding—vigorous, upright, sturdy, and bear unusually heavy crops; above average in winter hardiness."

You can see that BRISTOL is a most promising variety. It has been sold to the public since 1934 and is proving the statements of the N. Y. Station. You will want to get started with BRISTOL this spring.

BRISTOL INTRODUCTORY OFFER—18 No. 1 Plants Only 95c

ASPARAGUS

Mary Washington — Rust Proof

Now that canning companies have found how to can asparagus and retain all its delicious flavor and healthful food qualities they are contracting for greater supplies every year. At the same time there is a rapidly increasing demand from grocery stores and commission merchants for fresh asparagus during the summer season.

\$4,000.00 From 4 Acres

That is what one local grower made from his field of asparagus, and shows what can be done with the present day asparagus market. 5,000 roots plant an acre. In this section the cutting season is about two months, beginning in May before any other cash crop. One year plants are preferred by commercial growers.

There is a steady demand with average prices of 5 to 8 cents per pound. You can make money growing asparagus now!

Asparagus is easy to grow and you can make big profits from a small space. 50 to 150 plants will supply this delicious food for the family. A bed lasts for 10 to 15 years, and you can depend on heavy regular crops from our roots. It is most important that you get strong, healthy true-to-name plants. We grow them by the thousands from guaranteed tested seed on special soil to give you the best planting stock possible.

MARY WASHINGTON — Improved variety developed and recommended by U. S. Dept. of Agriculture. Heavy-yielding, pedigreed strain immune to rust; grows rapidly and produces uniformly tender shoots of excellent table quality; much larger, better flavored variety.

MARY WASHINGTON—Rust Proof

Paradise Asparagus . . . New!

Bears a Big Crop in Only One Year

That tells the story of this remarkable new Asparagus. It comes into full production quickly—no need to wait 2 or 3 years to begin cutting. PARADISE was bred and developed to do just that. We are glad to offer this new, early producing, deliciously flavored variety at these low prices:—
1-yr. No. 1 roots: 12 for 60c; 25 for 95c; 50 for \$1.65; 100 for \$2.85.

RHUBARB

Grow It For Home and Market—Make Good Profits on a Small Space

MYATT'S VICTORIA

Early Attractive pink stalk, delicious, mild flavor. This pink stalk, tender variety is preferred and brings best prices. Our stock is carefully grown from guaranteed tested seed. Victoria is ideal for pies and sauce. Transplants easily; produces abundantly.

1-yr., ½ to 1 Inch—Each 6c; 6 for 30c;
12 for 45c; 25 for 85c; 50 for \$1.45;
100 for \$2.75; 250 for \$6.45; 1000 for \$18.50.

1-yr., 1 Inch and up — Each 8c; 6 for 40c; 12 for 60c; 25 for \$1.10; 50 for \$1.90; 100 for \$3.75; 250 for \$8.55; 1000 for \$24.50.

VICTORIA CLUMPS

Large 2-year olds, ready to produce this summer. Just the thing to get Rhubarb started quickly in your garden.

PRICES—Each 18c; 3 for 45c; 6 for 70c; 12 for \$1.00.

MacDONALD CRIMSON

The New Red Rhubarb

This new variety is the best of all. Yields heavily from spring right through to late summer because it never goes to seed. Will last for years. Produces unusually large attractive crimson stalks and the good thing is that they are very tender and juicy (skin and all); not tough or stringy as most large stalks are. If everyone knew this grand new red rhubarb no other kind would be planted. It is so much better in every way—large size, rich red color, greater production, and best of all a deliciously sweet flavor. Plant MacDONALD this spring and enjoy it.

Our are all strong division roots ready to produce quickly.

PRICES—Each 35c; 3 for 98c; 6 for \$1.85; 12 for \$3.65; 25 for \$6.80.

CHOICE DAHLIAS

Selected Newer Kinds

The varieties in this collection are selected from more recent new introductions and regularly sell at many times this price. Here you have a wide range of color and shape of flower. Plump, strong tubers make fine flowers this summer. You will be proud of these beautiful, perfect blooms in your garden.

JERSEY'S BEAUTY—finest of all pinks.

JANE COWL—massive bronze.

JEAN KERR—popular white.

PRIDE OF CALIFORNIA—popular brilliant red.

MRS. de VER WARNER—large orchid lavender.

HARRY MAYER—light, pinkish purple.

Here's \$10.00 Worth of Flower Growing Pleasure

Selected Evergreen Collection—\$1.69

5 Popular Varieties—This collection of the better evergreens gives you those especially adapted to plant about foundations and doorways, and for larger plantings in the lawn, etc. Not seedlings or small transplants. You need these larger, stronger rooted transplants to make a quick start and rapid growth. Will be worth many times the cost in two or three seasons. Think of getting these fine evergreens for this low cost!

MUGHO PINE—3-year transplants. A true dwarf. Low branching stems spreading 6 to 8 ft. but only 4 to 5 ft. high. Heavy dark green needles.

PFITZER'S JUNIPER—8-10 inch. Dark, grey-green foliage; graceful low spreading form. Makes 6 to 8 ft. spread.

SPINY GREEK JUNIPER—8-10 inch. Compact, dwarf, broad pyramidal form. Fine blue-green color, stands out in any planting. Grows 3 to 5 ft. high.

PYRAMIDAL ARBOR VITAE—8-10 inch. Dense narrow pyramidal growth; can be sheared. Rich green. Grows 20 to 30 ft. high.

NORWAY SPRUCE—12-18 inch. A most beautiful, gracefully drooping, large evergreen. Deep green needles, rapid growth. Height 50 to 70 ft.

Get Those Bugs!

Baldwin's Multi-Purpose BUG-DUST-O-CIDE

This new, powerful insecticide will be a great aid to you in protecting your flowering and vegetable plants. It is excellent for combatting Aphis, Red Spider, Plant Lice, Cabbage Worm and Potato Bugs and many other pests. It is harmless to animals and humans when used according to directions.

"Multi-Purpose" Bug-Dust-O-Cide

has a triple-action, largely due to its Rotenone content. It works as a stomach poison, as a contact poison and as a repellent. It is also a valuable fungicide.

BLACKBERRIES

The Best Kinds For Home or Market

Did you ever see finer looking berries than those shown here? Blackberries are more popular than ever, but you must grow the right varieties and get the best quality of plants to secure the maximum profits. These varieties, we know, will produce the crops you expect and like our raspberry plants these bushes are Michigan double inspected, A-1 stock. You can expect the best results with such a start.

Early Alfred Blackberry

Quick Bearing, Early Ripening, Sweet Flavor
(See illustration and full description on inside back cover)

Eldorado Blackberry

Satisfactory Everywhere—Always Dependable

Every good quality possessed by other blackberries is emphasized in ELDORADO. Its exclusive advantages are: Absolute freedom from Orange Rust; a very heavy bearer with great, jet black berries.

Plants are so strong and vigorous they survive severest Northern Winter without mulching; Eldorado will produce paying crops in climates and locations where less hardy kinds will be frozen. A splendid shipper, because the berries are so firm. Plant Eldorado generously. They are making big money for other growers and will do the same for you.

Eldorado Root Cuttings

For best results, plant ELDORADO ROOT CUTTINGS rather than sucker plants. The cuttings are better rooted and thrive better even under unfavorable conditions. Our ELDORADO ROOT CUTTINGS are from thrifty plants in full bearing and especially satisfactory.

BEARING AGE BUSHES

Have Fruit This Summer

For quick crops in your garden, plant these big 2-year transplants. Heavily rooted and well branched, they are ready to bring you some berries this summer and a full crop next season.

ICEBERG WHITE BLACKBERRY

This is a really worthwhile blackberry. When fully ripe the berries are creamy white and of good sweet flavor. Easy to grow as any blackberry and produces plenty of its novel white berries. Put a few plants in the garden and surprise the neighbors.

PRICES: Each, 10c; 3 for 25c; 6 for 45c; 12 for 75c; 25 for \$1.35.

DON'T MISS
THIS
WORTHWHILE
NOVELTY

New Mammoth BOYSENBERRY

\$800 to \$1,500 Income Per Acre

55 berries fill a quart basket. Average size, 1 inch diameter, 1½ to 2 inches long—largest bush or vine berry known. Bushes are hardy (has stood 19 degrees below zero). Its exceptionally rapid growth, heavy crops, immense size and deliciously different flavor will amaze you. Grows like a dewberry and is as easy to raise. Ripens with them and fruits over a longer season.

Fine For Jams, Jellies, Pies

Boysenberry is a cross of Blackberry, Raspberry and Loganberry. Berries dark reddish-purple, wine-colored, juicy with a high flavor not found in other bush fruit. Unbeaten for jellies, jams, pies. A dozen plants give all you can use and some to sell.

Enormous Spicy Purple Berries

Boysenberry is a real money-maker because of its outstanding features of immense size, exceptional productiveness, unusual flavor and fine appearance—it is

impossible to realize how far superior in all of these qualities it is until you have seen it. Market growers are greatly increasing their Boysenberry plantings because these larger, better berries are proving big money-makers for them.

LUCRETIA DEWBERRY

Plant Lucretia to Increase Fruit Profits

Dewberries are coming back into favor because they are profitable. Lucretia is the finest Dewberry — incomparably better in size and flavor than any Blackberry you have seen or tasted. The price the grower receives for Dewberries averages 20 per cent more than for blackberries. You can see that it will pay to grow Lucretia.

Ripens 7 to 10 Days Before Most Blackberries

Ripens a week to ten days before the earliest ordinary blackberries. This, and the fact that they are unquestionably one of the finest looking berries of their kind and of such big, uniform size, makes them topnotchers on price in any market. Dewberries are especially productive in light soils. Plant Lucretia and such land will make you a profit.

RASPBERRIES

MAKE MONEY EVERY YEAR

You can expect the best raspberry varieties to give you a paying crop every year, just after strawberries are gone. They are demanded for table and canning everywhere at good prices. Every home fruit garden needs raspberries to make it complete. These are the best varieties and our prices are right—plant raspberries and make paying investment.

State Inspected—Healthy, Thrifty Stock

Good disease-free, healthy stock is needed by every grower—to plant any other kind is a waste of money. Berrien County, Michigan, is recognized as having the most healthy, most vigorous raspberry plants grown and every Baldwin plant is twice inspected and certified by Michigan State Inspectors. This makes your success more certain.

TAYLOR

Giant-Size Better Late Berry

Taylor is rapidly coming to the front as the best general purpose red raspberry next to Latham. It has stood up and produced paying crops under most every growing condition and in every fruit section where it has been planted.

This new variety has every quality needed to make it a perfect berry. Berries larger than any other, except Newburgh, uniform and pointed in shape, very firm (will not crumble when picking) bright snappy red color—all qualities that make TAYLOR an ideal shipper, arriving in best appearance to bring highest prices. Its large size holds up well over a very long season. Its delicious

sweet flavor and thick juicy flesh make it just right for eating, canning and preserving at home.

Outstanding In Every Good Quality

The bush is an unusually upright strong-caned grower, makes picking easy and keeps the fruit well off the ground. Plants are exceptionally hardy under severe weather conditions. Crops are unusually heavy. Originated by New York Expt. Station and is the best of its recent new kinds. TAYLOR has shown that it will become a leading red variety in all fruit sections because it is outstanding in every good quality.

TAYLOR

TAYLOR is a really fine variety. You will make no mistake in planting now. Other fruit growers are planting too. Our customers planted more than twice as many Taylor last year as they did in 1939.

ST. REGIS EVERBEARING Bears Thru Summer and Into Fall

Just think of having ripe red raspberries from your own garden through August and September long after other berries are gone. That's what you get with St. Regis. They are mighty profitable to sell them, too, because premium prices of \$4.00 to \$5.00 for a 24-pint case are not uncommon for these fine out-of-season berries.

Bushes are good size, upright, vigorous and remarkably free from disease. St. Regis produces a full spring crop as well.

LATHAM

Most Profitable Late Red

Latham has definitely proved to be the best red raspberry money-maker in every fruit section of the country. Each year for the past five years we sold more Latham plants than all other red varieties put together.

For general planting in all sections, Latham is the best because this hardy, vigorous grower can be depended upon for big annual crops of finest looking berries. Fruit buyers on every market pay a premium for Latham's bright color, firmness and long keeping quality. These things and its most delicious flavor make it equally desirable for home gardens.

Hardy, Productive, Dependable

Hardy and very productive—far out-yielding older kinds, it ripens from mid-season to late. We wish we could convince you what a truly fine berry LATHAM is in every way. If you have grown it you already know. Berries are all above average size, bright red, and make the most attractive appearance of any red variety; the flavor is of the finest. You will make no mistake in planting all you can.

LATHAM

Latham Is Still the Best Everywhere For Profit

FOR CANNING—Jams and Jellies—Unusually rich color that does not fade, and what a wonderfully delicious, true, fresh raspberry flavor! The ideal berry for canning uses.

GOVERNMENT EXPERIMENT STATIONS—Recent reports from leading fruit states say that Latham is the best and most profitable berry for its season and highly recommend it for planting.

Baldwin's Guaranteed, True-to-name, Disease-free, Genuine LATHAM. You cannot afford to plant any but the best.

CHIEF

The Best Early Red Raspberry for Home or Market

Chief is replacing King and other early kinds because it is better. Early Chief is paying Michigan growers well. Berries are of good size and color, firm, and reach the market in good shape for early-season high prices. Perfectly hardy, a vigorous grower and heavy producer—Chief will make good anywhere.

Chief plants received from us are guaranteed true-to-name and No. 1 in every respect. Early red raspberries always pay well and with Chief you can depend on some extra profits. It has been a long time since we offered a red raspberry we think so much of as Chief, and we recommend it to you as better than any other early red sort and one that will pay you well.

PLANT
CHIEF

The Fine New Mid-Season Berry

Newburgh is coming to the front in all sections as a leading variety. Our plant sale last spring was twice that of 1938. The berries are very large—probably larger than any other red, very firm, of good flavor, do not crumble, and are a bright attractive red. Because even young plants make many branches it bears a full crop quickly—and it is a very heavy bearer. Bushes are hardy, vigorous growers and after 10 years have shown no mosaic. Think what this means by making certain full annual crops for several years.

Heavy Bearer—Bigger Berries

Newburgh was originated by the N. Y. State Experiment Station and is satisfactory everywhere. The N. Y. Fruit Testing Ass'n says it is the best variety now grown in New York State. Ripens five days before Latham, is of better keeping and shipping qualities, and is of better flavor. Price on our genuine Newburgh is low and we hope every raspberry grower will take advantage of it.

SPECIAL CASH DISCOUNTS FOR EARLY ORDERS—PAGE 3

TREE FRUITS

FIRST GRADE TREES—BEST VARIETIES—LOW PRICES

Buy Baldwin guaranteed true-to-name, well rooted, quick-growing trees. These are high-quality, proven value varieties, best adapted to eastern, middle-western and northern soils and climates. There is real pleasure and a big saving in having two or three trees of each fruit right in your garden. As a commercial proposition, tree fruit is always in profitable demand.

APPLES

Baldwin—WINTER. This widely known variety averages about medium size, rich dark, red, juicy, fine flavor. Good for market and home use. One of the first two or three varieties in the great Michigan and New York apple sections.

Cortland—WINTER. Many customers have asked us for this newer apple and we are glad to supply them. Cortland is an excellent, early bearing, long keeping McIntosh type. Large fruit streaked with bright red and yellow. One of the best commercial sorts.

Delicious—(DOUBLE RED). Winter. Known world over. Brilliant dark red, shading to yellow at blossom end. Large to very large; white tender juicy flesh. Wonderfully rich sub-acid flavor — truly delicious. Ships without bruising makes a wonderful appearance, commanding top prices. Comes into bearing early.

Yellow Delicious—LATE FALL. This beautiful new apple has the distinctive shape and big size of Red Delicious with an added deliciousness and mildness of flavor that is unsurpassed by any apple. Flesh solid, crisp and full of juice; its rich golden-yellow, firm smooth skin gives it a luscious appearance. This new, highest quality apple is always in demand and brings top prices. Plant it now.

Grimes Golden—WINTER. Favorite mild eating apple. Excellent keeper, uniform shape, typical dull gold color. Hardy productive tree. Carefully selected and grafted trees insure satisfaction with this fine apple.

McIntosh—WINTER. A MONEY-MAKER. Today. Juicy snow apple—white, crisp flesh; beautiful solid crimson color. Excellent quality—wine-like, true apple flavor. Good annual bearer. Rapidly increasing popularity among consumers everywhere makes good prices certain. One of the most profitable apples.

Northern Spy—WINTER. The old, well-known favorite. Delicious juicy flavor; excellent for eating and cooking. Brilliant streaked red color. Always in demand; good prices; long keeper.

JONATHAN

Jonathan—LATE FALL. Sold in every store. Glossy red; fine grained, juicy flesh, excellent flavor. Medium to large size. Unusual keeper (to February) makes it a most profitable commercial apple. Quick to bear and easily grown in practically every fruit section. Jonathan is first choice in many homes.

Red Astrachan—BEST EARLY SUMMER. Well known old sort. Large round, crimson apple; rich juicy, excellent eating and cooking early apple. Vigorous and productive tree.

Stayman's Winesap—LATE WINTER. Best Winesap. Extra large, bright red, crisp, juicy with a wonderful zestful flavor. Stayman easily leads all other Winesaps. Heavy bearers and big money-makers everywhere.

Wealthy—FALL. Heavy yearly bearer. Hardy, long lived. Attractive brilliant red striped; superior quality, wine-like flavor. An all-round apple for eating, cooking, cider and market.

Yellow Transparent—EARLY FALL. Has proven both popular and profitable. Fruit large yellow with crisp sub-acid flavor. Heavy annual bearer; well known everywhere.

Hyslop Crab— Recognized as the best of all crabapples. Its hardy, quick growing tree comes into bearing early. Strong, disease-resistant. Always a heavy annual bearer. Fruit beautiful deep red; firm, juicy, uniform—sells well. Fine for home use.

THREE OF THE BETTER NEW APPLES

ANOKA

Have Apples the Second Year. Bears on one year old growth and bears annually. Ripens in August; very heavy bearer; fruit red stripes over yellow; fine cooking quality, short keeper. Originated in South Dakota, perfectly hardy. Does best in central and northern sections.

PRICE: Each, 42c; 3 for \$1.20; 10 for \$3.70.

BEACON

All-Red Early Eating Apple. Originated at Minnesota State Farm; exceptionally hardy. Superior among early apples for its uniform good size, bright solid red color, excellent flavor, good keeping (a month after picking) and cooking qualities. Ripens about with Duchess and often sells for twice as much.

PRICE: Each, 47c; 3 for \$1.35; 10 for \$4.20.

DOLGO CRAB

Striking, Dazzling Red, New Crab-apple. Unbelievable heavy bearer; free from blight. Jells quickly even when fully ripe. Good to eat fresh. Beautiful hardy trees, thrives everywhere. Called the "Perfect Crab." Dolgo is replacing older varieties. Its lustrous green leaves and mass of pink blossoms make it ideal for lawn planting.

PRICE: Each, 47c; 3 for \$1.35; 10 for \$4.20.

PEACHES

Elberta—SEPTEMBER 1. PLANTED BY THOUSANDS.

Standard commercial peach. Plant Elberta and be sure of a crop. Large to extra large. Freestone. Golden yellow flesh, red at the pit, firm, juicy. Has no equal as a prolific bearer and shipper. Best known peach.

J. H. Hale—LATE AUGUST. FIRST IN SIZE. COLOR.

Quality. Yellow, thick skin, colors to a rosy tint. Deep yellow, fine grained very firm flesh—delicious flavor. A beautiful peach, fresh or canned. In size, color and quality, no peach compares with Hale. Always brings \$1.00 to \$1.50 more per bushel.

South Haven—AUGUST. THE PROFITABLE EARLY

Peach. Originated in the famous Michigan Peach Belt, South Haven, has proven one of the best varieties in every peach growing section. Experiment Stations recommend it when an earlier peach than Elberta is desired. Withstands severe winter cold. As fine a peach as the standard Elberta, firm, highly colored—and ripens 12 to 18 days earlier.

Champion—EARLY AUGUST. BEST WHITE FREE-

stone. Many prefer this white peach. Full of rich juice, finest flavor. Large red cheek. Heavy bealer; very hardy.

HALE HAVEN
PEACH

The Famous HALE HAVEN

MID-AUGUST. Wonderful new peach with great size and beautiful color of J. H. Hale and earliness of South Haven. A better peach of richest flavor; yellow flesh firm and juicy. Better shipper than South Haven; always freestone; bears every year. Hale Haven is one of the best and its sale shows a far greater increase than any other kind. Always brings more money. Ripens 10 to 15 days before Elberta and is second only to that grand variety in popularity and profits.

New HARDEE

(See Illustration on Back Cover)

U. S. Plant Patent No. 120

THE HARDIEST PEACH—PRODUCES FULL CROP AFTER 18 Degrees BELOW ZERO

This record is reported by Ohio Experiment Station. It means sure crops when even Elberta fails, and that means soaring peach prices. HARDEE is a drought-resisting, steady bearing, sure-cropping tree. Fruit is a delicious, high quality, yellow freestone. Ripens with Elberta; is more elongated, rich yellow with red cheek. Shipping, keeping and home use qualities are excellent. Successful peach crops can now be grown in many sections that were too cold before. Plant HARDEE, the cold resisting peach, and safeguard your future crops. **PRICES: 7-16 trees Each, 55c; 10 for \$4.50; 30 for \$10.50. (Net, No Discount.)**

Order Your HARDEE Trees Now!

SOUR CHERRIES

EARLY RICHMOND—One of the most popular sour cherries, unexcelled for cooking. Dark red, tart, and juicy. Hardy trees uninjured by cold. Big crops.

MONTMORENCY — Ripens late in June and is best sour cherry for market. Makes delicious pies; fine for canning. Fruit larger than Richmond; bright red, acid flavor.

Grow Montmorency for the Canning Factory Market

SWEET CHERRIES

BLACK TARTARIAN—Extensively planted and prolific. Regular bearer of big, black juicy, sweet fruit. Hardy, vigorous. Best and most profitable black sweet cherry—for market and home.

NAPOLEON-YELLOW—Old-time favorite, succeeds practically everywhere. Heavy bearer of large light yellow heart-shaped fruit.

SCHMIDT'S BIGARREAU—Newer sort. Unusually hardy. One of the best late sorts, especially in Northern sections. Largest size, firm fruit; deep red to mahogany. Brings best prices.

WINDSOR—Liver colored large cherry, wonderful flavor. Originated at Windsor, Canada. Hardy prolific tree. Valuable for market or family use.

LARGE
MONTMORENCY

NOW! DWARF TREES

At Reasonable Prices

Dwarf apple and pear trees are highly prized for the small garden where space is limited. They make plenty of fruit possible as these sturdy little trees bear a big crop way out of proportion to their size. Dwarf trees are well suited for ornamental planting too, and their fine, fresh fruit is always a pleasure.

Full Size Fruit from Dwarf Size Trees

These apple and pear varieties cannot be beaten for a home use planting:

Pound Sweet Apple for late summer.

McIntosh Apple for early fall.

Yellow Delicious Apple—late fall—early winter.

Douglas Pear—Often bears the 2nd year after planting.

Bartlett Pear—Favorite summer eating pear.

Seckel Pear—Early fall sugar pear.

Well branched, well rooted, 2-year trees ready to make quick growth and good crops of full size fruit. Plant about 10 feet apart.

Low Prices on Opposite Page

PEARS

Bartlett—SUMMER. KNOWN FOR QUALITY.

One of the best known and popular varieties for both commercial and home orchard planting. Golden color with red streak, mellow and indescribably delicious both fresh and canned. Heavy bearer.

Kieffer—FALL

Best pear for large commercial planting, because of its sure crop, heavy yield and excellent shipping qualities. Kieffer has been proven unexcelled for commercial canning. A local cannery used over 200,000 bushels in one season.

Seckel—EARLY FALL.

A medium size pear that ripens late in September. Extremely fine quality and flavor. Always in market demand and equally valuable for home use.

Douglas Pear—Bears In 2 Years

Why wait 5 or 6 years for a crop of pears when the NEW DOUGLAS very often bears the second year. Young trees have been known to bear in the nursery row. Heavy bearer of good quality fruit. Very hardy, producing fruit from a second set of blossoms when the first was frozen. Very blight resistant. Juicy, sweet, delicious.

PRICE: Each, 54c; 3 for \$1.55; 10 for \$1.95.

German
Prune
Plum

STANLEY PRUNE

Recommended by New York Expt. Station as the best new early plum—early August, 10 days before German Prune. This new Stanley is the finest prune type plum; fruit largest size, dark bluish purple, freestone, fine grained, tender, juicy and sweet. Firm and does not crack. Excellent quality for cooking or eating. Produces heavy full crop every year; often bears in 3 years.

PRICE: Each, 63c; 3 for \$1.75; 10 for \$5.75.

DOUGLAS PEAR

PLUMS

Burbank—DELICIOUS TABLE PLUM.

Hardy Japanese variety free from black knot. Deep red color, unusually delicious flavor. Keeps three weeks after ripening. Ripens August 15 to Sept. 1.

German Prune—BEST FOR CANNING AND PRESERVING.

Medium size, dark purple plum. Firm sweet, the favorite everywhere for canning. Tree easy to grow, remarkably free from disease, very productive. Good keeper, excellent shipper. Ripens in September.

Green Gage—THIS ROUND, GREENISH-YELLOW PLUM HAS ABOUT THE SWEETEST FLAVOR OF ALL.

Every housewife wants Green Gage for canning and preserving. Medium size, full of juice, unusually heavy bearer. Always sells well. Late September.

Yellow Egg—BEST YELLOW PLUM. EXTRA LARGE FRUIT.

Clear yellow egg shaped. Fine for table or canning use. Hardy productive tree. Ripens August.

APRICOTS

Moorpark—

Have 2 or 3 trees of this delicious fruit in your garden. Very large, golden yellow fruit, red cheeked, freestone, sweet and juicy. Hardy, heavy bearer—ripens August.

QUINCE

Orange—BEST OF ALL QUINCE.

Regular annual bearer of fine, large delicious fruit. Hardy, early bearing trees. Plant for Profit—Quince always brings high prices.

New FREDONIA Grape

A Far Better Extra Early Black

Originated and tested by N. Y. Expt. Station, FREDONIA is the best extra early sort, ripens 10 days before Moore's Early and 3 weeks ahead of Concord. Berries are very large, hang well to the bunch and are firm, juicy and of fine flavor. Skin is thick and tough to make a good shipper. Vine is vigorous and productive with medium size very compact bunches.

Early grapes make the most money and FREDONIA is a fine quality extra early grape far ahead of any other early kind now on the market. The bunches keep their vine-fresh firmness and fine appearance for days after picking. Begin your planting of this new kind this spring.

SPECIAL CASH DISCOUNT FOR EARLY ORDERS—PAGE 3

SOILMASTER PLANT FOOD

Soilmaster is a decomposed, concentrated leaf-mold and decayed vegetation properly mixed with marl and scientifically blended to give the best results. It should not be confused with plain peat-moss or muck. No filler is used in its composition. By adding water it gradually breaks down so the plant receives food throughout the growing season. This is the humus to use on lawns around shrubs and in your garden. Holds seven times its weight in moisture, and is a good fertilizer. Rejuvenates gardens, lawns, shrubbery and trees; is a natural plant food, a natural soil builder; far superior to stable manure, has the same fertilizing value, is clean, odorless and does not burn; and can be applied any time and anywhere. Is ideal for potted plants, bulbs and flower gardens. Requires less water after application than other fertilizer as it holds moisture for an indefinite period. Makes the soil mellow and prevents baking. Soilmaster goes farther, lasts longer and is more economical; 2 bushel bag, which is approximately 100 lbs. is enough for 100 sq. ft. of lawn surface or 8 good sized shrubs or ornamentals. You are assured of a three year's growth in two years' time by using Soilmaster. (Note testimonial.)

Sodus Acid Humus

Sodus Acid Humus will hold moisture and has the same fertilizing value as Soilmaster—the only difference between the two is that one is sour and the other sweet. We recommend this humus for Evergreens, Rhododendrons and Blueberries or any shrub or ornamental that requires an acid soil. It is also ideal for bent grass lawns where an acid condition is necessary.

NOTE: BOTH CONTAIN ACTIVATED
VITAMIN B.

PRICE OF SOILMASTER AND SODUS ACID HUMUS — Net, No Discount.

Specify which you want when ordering.

10-lb. bag, 25c. Postage on 10-lb. bag same as 100 strawberry plants—page 26.

2-bu. bag. (about 100 lbs.) for \$1.00. Freight shipment collect unless otherwise instructed.

Gentlemen:

Kent, Ohio

As a result of our many years spent in the care of thousands of fine trees, we know that lawn trees must be supplied with artificial food—more especially with humus.

After vigorous tests and use extending over a period of four years, we are glad to say that Soilmaster has proven itself to be an ideal form of humus. Results following its use have been uniformly satisfactory and at times quite amazing.

We therefore take pleasure in recommending the use of Soilmaster. Inasmuch as it is taken from the natural soil deposit, there seems to be no danger of overfeeding or burning in its generous use.

Sincerely yours,

The Davey Tree Expert Company,
Signed, M. L. Davey, President.

GRAPE VINES

A Lifetime of Crops and Profits

Michigan vines rank among the finest grown and because of our specially adapted soil and location, you can depend on these of ours. Every one is grown from heavy producing vineyards only, so they will bear full crops of No. 1 grapes for you. Really good grape vines are scarce because it requires proper soil, fertilization and grading to produce first grade stock. We are fortunate in having some fine, well-rooted vines. It is no trouble to grow grapes. Few plantings have been made recently so now is the time to plant.

Because of conditions in Europe, wine making is on the increase in this country. This means a greater demand and better prices for all grapes in the next few years. Why not plant now and be ready with good crops of fine grapes?

CONCORD

The Universal Black Grape

Concord is always in good demand—the standard by which all other black grapes are judged. No vineyard or arbor is complete without Concord. Best for market, eating and home uses.

It is the main crop for every grower everywhere and produces big crops on any soil every year. After the first expense the cost of up-keep is but little. It is a profitable permanent investment.

Our Concord vines are well rooted, especially adapted to the central west and guaranteed to reach you in perfect growing condition.

CONCORD
The
Standard

NIAGARA—(White)

Best White Grape for Every Purpose

The best known and most popular of all white grapes, ranks with Concord in prolific bearing size and quality. An unusually mild delicious flavor makes Niagara one of the finest table grapes. A hardy, vigorous grower that will always make good vines and yield heavy crops.

Medium compact, large bunches; berries mostly round, of greenish-white color; very juicy and of excellent flavor, skin is thin but tough and does not crack, making it a fine long-distance shipper.

New PORTLAND—(White)

Fine Extra Early Grape

Similar to Niagara in its large size bunch and full oval berries, Portland ripens three weeks earlier. Production is heavy, young vines bear early and continue to bear good crops every year. Berries are of good size, fine and sweet in flavor. Vines entirely hardy. Portland was introduced by N. Y. Expt. Station and is proving an excellent profitable grape because it ripens so early and its quality is so good.

MOORE'S EARLY—(Black)

A heavy producing early variety. Profitable for commercial growing because it gets the early season prices. Similar to Concord in appearance and quality, ripens about two weeks earlier. It has a peculiarly sweet flavor that makes it a good table grape.

New CACO—(Red)

Big, Sweet, Juicy, Productive

Caco is A-1 in every respect. Hardy, quick bearing, produces every year; fruit beautiful, unusually large size, clear amber color and best of all has a flavor of such sweetness it is a superior table grape.

Caco is a most beautiful hardy grape. Always in demand at grape markets with extra prices. Widely endorsed by experiment stations. Vines just as easy to grow as any other. There is always room for a few vines somewhere. **Don't be without Caco.**

DELAWARE—(Red)

Long called the standard of excellence of all grapes as a table delicacy. Bunch small, compact, sometimes shouldered; berries small with thin skin and of unusually sweet flavor. Ripens with Concord. Hardy.

It is impossible to tell you how really delicious these little red grapes are. Don't fail to plant a few vines this spring. Just a little space over the back porch or on a trellis. 3 or 4 vines.

"Red, White and Blue"!

IN THE HEART OF THE POULTRY INDUSTRY

INSTRUCTIONS FOR ORDERING—PLEASE READ CAREFULLY

LOCATION:—Bridgman, Berrien County, Southwestern Michigan—the heart of the "Michigan FruitBelt." Fast service to Chicago trunk lines east, west, north, south.

PARCEL POST SHIPMENTS:—See Table Below. Locate the group in which you live and then figure amount of postage to send from table below. Cheaper for small orders. Prompt delivery to your door. If you request mail shipment, but include no postage in your remittance we will ship C. O. D. for exact postage required.

EXPRESS SHIPMENTS:—Reduced rates from Bridgman now make express cheapest for all except small orders. All shipments insured. Rapid handling and safe delivery guaranteed. Generally the best way of shipment. Charges not prepaid.

SHIPPING SEASON — SPRING:—From about March 15th to May 25th, according to season. Fall:—October 15th to November 15th.

PACKING: No charge. All plants packed in damp moss or shingle tow. Will keep in good condition 5 days to 2 weeks, according to time of shipment and weather conditions. Each variety carefully separated and correctly labeled.

SUBSTITUTION:—Not without your permission except on late orders when time is often saved by substituting varieties of same season and value as those ordered. Satisfaction guaranteed on varieties substituted.

HOW TO ORDER:—Write your name and address plainly on enclosed order blank. Indicate "Mail," "Express," or "Our Judgment," as you prefer. If express shipment be sure there is an express office at the destination you give. Send remittance. Orders acknowledged.

PRICE:—Prices good until June 1st, 1941, except any increase in cost or selling price of nursery stock due to government taxes or legislation may be added.

TERMS:—Orders of \$5.00 or less, please send cash with order; if more than \$5.00, you may remit 25 per cent of total with order, balance before shipment if you prefer. If you request, we will make C. O. D. shipments up to May 1st, when 25 per cent of total amount is sent with order; no discount allowed.

REMITTANCE:—Postoffice Money Orders are safest. Express Money Orders, Bank Drafts and Personal Checks accepted. If you send Currency register your letter.

REFERENCE:—The State Savings Bank, Bridgman, Mich., Express Agent or Postmaster, Bridgman, Mich.

COMPLAINTS:—All complaints as to condition on arrival, shortage, or errors must be made within five days after stock is received. This allows ample time to examine shipments and if there is anything wrong, advise at once. Complaints as to condition on arrival must be accompanied by express or postoffice receipt showing statement of bad condition.

INDIAN SUMMER

New Everbearing Red Raspberry

Here is a distinctly new type of everbearer, unlike any older kind.

"Marvelous" justly describes Indian Summer. The quantity, size and quality of the berries it produces in September, October and November are truly marvelous because they are so far superior to any other everbearer. With such a berry you can make worth-while profits from the high prices always paid for off-season fruit. You get a good early crop in the regular season, too.

Far Superior to Any Other Everbearing Raspberry

Berries are uniform, rich red, thimble-shaped, large and juicy; flavor a true, tart, delicious raspberry. St. Regis berries are small and poor by comparison. A thrifty grower and heavy producer. Another N. Y. Station berry. You have never seen any fall berries as good in every way as INDIAN SUMMER. Be sure to plant this spring. (Prices, page 20.)

INDIAN
SUMMER

Early **ALFRED** *Blackberry*

Alfred is best for every use. It has been grown by leading fruit growers and proven the **Best Early Blackberry** variety. We unreservedly recommend it to our customers as thoroughly satisfactory and the equal of any blackberry early or late when it comes to producing big crops and paying worth-while profits. Think of a bush full of tremendously big blackberries from $1\frac{1}{2}$ to $1\frac{3}{4}$ inches long, practically free from seeds, coreless and with a thick pulp fairly bursting with sweet delicious juice. That's Alfred

Paying Crops of Big, Juicy, Delicious Berries

Alfred ripens a full 10 days ahead of Eldorado and continues all through the Eldorado season. Alfred berries are bigger, brighter colored, of better flavor and bring better prices right along. Once you grow Alfred you won't be satisfied with any other berry—fine, large berries that carry well to market.

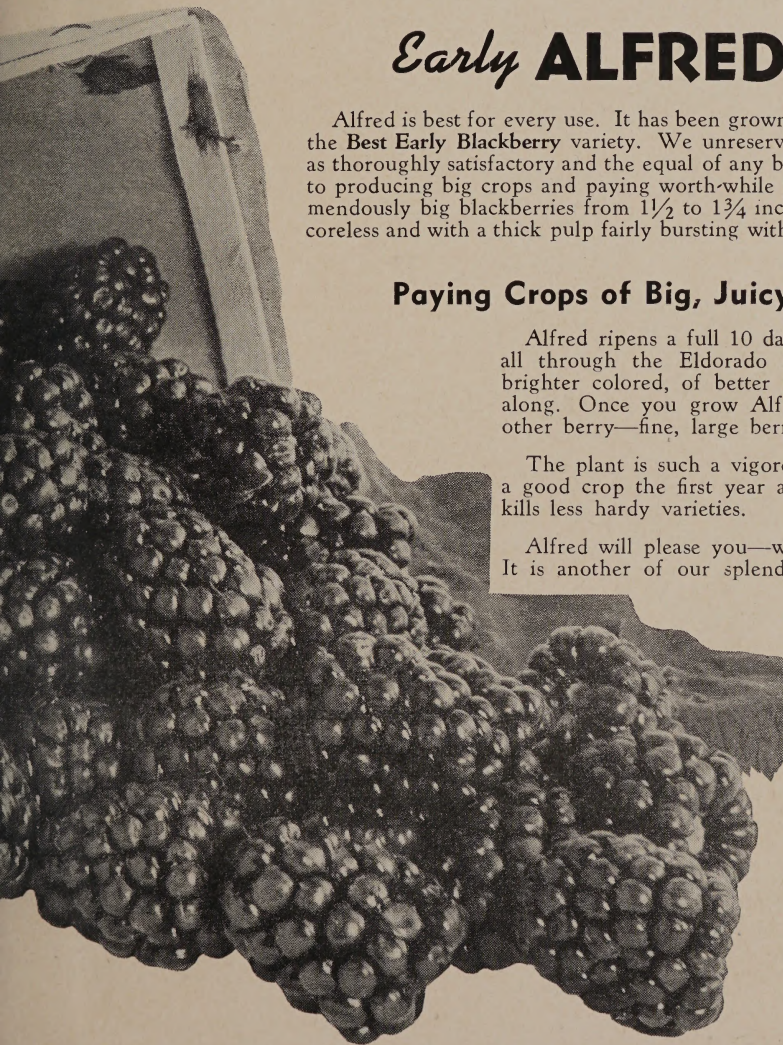

The plant is such a vigorous, healthy grower that it produces a good crop the first year after planting. Withstands cold that kills less hardy varieties.

Alfred will please you—whether raised for pleasure or profit. It is another of our splendid varieties—selected for its worth. Alfred plants are still scarce, but we are making a price within the reach of all, because everyone should have this wonderfully fine berry.

THE NEW BOYSENBERRY

Lots and lots of great
big, luscious purple ber-
ries. See page 17.

The New GIANT BLUEBERRIES

Ornamental as Well as Enormously Productive

These genuine cultivated Blueberries have been originated and improved by government experiment to produce big yields of giant size, deliciously sweet berries. Now every garden can have enough for canning and pies—2 to 6 bushes. Two varieties to lengthen the season are advised. Ripen from early July to late August. Bushes make a beautiful and useful ornamental shrub.

Cultivated Blueberries for market are profitable, selling retail from 35c to 65c per quart. Many new plantings are being made because profits are good.

Bushes last a lifetime and require no unusual care, yields vary from 3 to 9 quarts per bush depending on age. Of the many varieties being offered we have selected the 3 that in our opinion are best, most productive.

RANCOCAS. Midseason. Hardy, vigorous, productive; very large, firm berries of excellent sweet flavor.

RUBEL. Late. Hardy, vigorous and very productive, upright grower; large, extra firm berries of good quality. Recommended for commercial use.

HARDING. Late. Sweetest of all. Hardy, very productive; spreading growth. Longer fruiting season.

PRICES OF BLUEBERRY PLANTS

2-yr., No. 1, sure to grow; start to bear second season: 2 for \$1.35; 4 for \$2.40; 6 for \$3.35; 12 for \$6.15; 25 for \$12.00.

3-yr., No. 1, bearing-age bushes: Each \$1.10; 3 for \$2.95; 6 for \$5.15.

Blueberries can be grown satisfactorily on sandy or muck soil that is strongly acid and well supplied with water. Soil not acid can be made so by mixing in acid peat or Sodas Acid Humus. (See page 25).
